

## 1. Project Subject

The subject of my website is **NaijaFixIt** – a simple platform that connects people to nearby artisans like electricians, plumbers, tailors, and others who offer useful services.

## 2. Description of Planned Content

The website will have pages that allow users to find artisans based on their location and service type. It will also have a form where artisans can register their services. The site will include an About page, a Contact page, and an easy way for people to connect with skilled workers around them.

## 3. Reason

I chose this topic because in many areas, it's hard to find trusted artisans when you need help. This site will make it easier for people to find help fast, and it will also give local artisans a chance to get more work and grow their business. It's useful for both sides and can really help the community.

## About Page Content (Simple and Clear)

### About NaijaFixIt

NaijaFixIt is a platform created to help people find skilled and trusted artisans near them. Whether you need an electrician, tailor, plumber, or any other service, our goal is to make it fast and easy to connect you with someone who can help.

We also want to support local artisans by giving them a place to show their skills and reach more customers. Everyone wins — the customer gets the help they need, and the artisan gets more jobs.

This idea came from a common problem in our communities: people often don't know where to find reliable help when they need it. NaijaFixIt solves that by bringing everyone together in one simple website.

<b>Register as an Artisan</b>
-------------------------------

☐ Fill the form below to be listed on NaijaFixIt

[ Full Name ]

[ Phone Number ]

[ Type of Service ] (Dropdown: Plumber, Tailor, etc.)
